Reactive

CONCRETE STAIN

HERITAGE Reactive Concrete Stains are a group of organic colored acid concrete stains. The final brilliant results are unmatched by any other process and leave an antique patina type finish. They react chemically with the mineral content of the concrete surface for a deep penetrating permanent stain. These stains are UV stable when sealed.* Use interior or exterior. HERITAGE may be diluted up to 1:1 with water.

Benefits

- **Provides a wide range of natural colors**
- **Concentrated form allows color control**
- **UV Stability when sealed interior or exterior***
